

ARHS 6810-01 The Art of Digital Scholarship

Dr. Adrian Anagnost & Dr. Alexis Culotta Tuesdays 1 - 3:25pm

In step with our modern world that is increasingly focused on digital applications, this undergraduate seminar is designed as a gateway course for students to embrace the potential of digital manifestations of their research.

Students will gain exposure to the fundamental terms and technologies used in the field while at the same time be challenged to think more deeply about how we define, visualize, and ethically maintain data once when broadcasting it to the larger public.
